# ABOUT THE NDM COMMUNITY & CONFERENCES

For nearly four decades, the field of Naturalistic Decision Making (NDM) has been concerned with the study of how people make decisions in complex real-world settings.

What we have learned about NDM has changed the way we train decision makers, the types of decision support we provide, and the way we design organizations.

**“I find NDM methods and NDM research to be remarkably useful in real world business situations — to the point where I don’t know why more people don’t write or read about NDM methods.”**

- Cedric Chin

Since 1989, the NDM conferences have been the world’s leading conferences on Naturalistic Decision Making. The conferences have alternated between the U.S. and Europe biennially, and have served to disseminate new development in knowledge elicitation, training, system design, evaluation, and teamwork.
